

Earth Grounding Point Labels (1000/roll) ESD

SKU: 104-133

Features & Benefits

- ◆ **36mm diameter** for clear, visible identification of grounding points
- ◆ **1000 labels per roll** for large-scale installations or multiple uses
- ◆ Made from durable vinyl for long-lasting adhesion
- ◆ Ideal for marking earth grounding points in ESD-controlled areas
- ◆ Essential for maintaining ESD safety and electrostatic discharge (ESD) protection

About the Earth Grounding Point Labels (1000/roll) ESD

Our Earth Grounding Point Labels are specifically designed to mark grounding points in ESD-sensitive environments. These vinyl labels are an essential component of ESD control measures, ensuring that grounding points are clearly identified and accessible for safe use. The labels are 36mm in diameter and come in rolls of 1000 labels, providing a cost-effective solution for large-scale installations or ongoing maintenance.

The ESD Grounding Labels are made from high-quality vinyl, ensuring durability and long-lasting adhesion in both industrial and office environments. The labels are ideal for marking grounding points for wrist straps, ESD mats, and other static control equipment. Their high-visibility design helps maintain ESD safety protocols, preventing electrostatic damage to sensitive electronic devices.

These Earth Grounding Point Labels are a simple yet effective way to ensure ESD compliance and promote a safe working environment for sensitive electronic equipment.
