

Economy Range - Flat Brush 15mm ESD

SKU: G-BR-6

Features & Benefits

- ◆ ESD-safe brush for cleaning ESD-sensitive assemblies without generating harmful static
- ◆ Ideal for use in electronics, telecommunications, and other static-controlled environments
- ◆ Ensures the protection of sensitive components during cleaning tasks

About the Economy Range - Flat Brush 15mm ESD

Economy Range - Flat Brush 15mm ESD – Safe Cleaning for Static-Sensitive Assemblies

The Economy Range - Flat Brush 15mm ESD is designed specifically for ESD-sensitive environments, ensuring safe cleaning of delicate components without generating harmful static charges. The brush is ideal for cleaning electronic assemblies, printed circuit boards (PCBs), and other sensitive equipment in environments where static control is critical.

With 15mm bristles and a compact 130mm handle, this brush is perfectly sized for precision cleaning in tight spaces. It provides effective dust and debris removal, helping to maintain the integrity and performance of ESD-sensitive assemblies.

Specifications

Property	Detail
Handle Length	130mm
Bristle Dimensions	15mm
Application	ESD-protected areas, electronics mfg, cleanrooms
