

Economy Range - Medium Round Brush ESD

SKU: G-BR-5

Features & Benefits

- ◆ ESD-safe brush for cleaning ESD-sensitive assemblies without generating static charges
- ◆ Ideal for use in electronics, telecommunications, and other static-controlled environments
- ◆ Ensures the protection of delicate components during cleaning tasks

About the Economy Range - Medium Round Brush ESD

Economy Range - Medium Round Brush ESD – Safe Cleaning for Static-Sensitive Assemblies

The Economy Range - Medium Round Brush ESD is specifically designed to offer ESD-safe cleaning in environments where static control is critical. Perfect for cleaning ESD-sensitive assemblies, printed circuit boards (PCBs), and other delicate electronic components, this brush ensures the removal of dust and contaminants without generating harmful static charges.

With a handle length of 105mm and 10mm bristles, this brush provides precise cleaning, even in tight or hard-to-reach areas. Its 18mm bristle length ensures effective dusting and debris removal, helping to maintain the functionality and integrity of static-sensitive components.

Specifications

Property	Detail
Handle Length	105mm
Bristle Dimensions	10mm
Application	ESD-protected areas, electronics mfg, cleanrooms
