- ◆ The Simple Rigid Awareness Sign (150mm x 300mm) features bold black text on a yellow background, offering high contrast for clear visibility

## About the Entering A Protected Area Awareness Sign ESD

### Self-Adhesive Rigid Signs for Effective ESD Control Awareness

Our rigid signs are the perfect solution for promoting ESD control measures in your workspace. Designed for maximum visibility and durability, these self-adhesive signs are ideal for ensuring that employees are aware of crucial electrostatic discharge (ESD) safety protocols. Made from rigid Foamex material, these signs are both strong and light, making them easy to mount while ensuring long-lasting performance in various environments.

The Simple Rigid Awareness Sign (150mm x 300mm) features bold black text on a yellow background, offering high contrast for clear visibility. The self-adhesive backing ensures easy installation, requiring no additional tools or mounting hardware. These signs are an essential component for any workplace where ESD protection is critical.

Ensure your ESD control measures are clear and effective with these high-quality, self-adhesive signs that provide long-term durability and exceptional visibility.
