- ◆ **Flush Cutter:** Delivers clean, flush cuts for a professional, smooth finish.
- ◆ **Safety Clip:** Available to securely hold wire scraps after cutting for added convenience and safety.
- ◆ **Safety Clip Type (AF):** Ensures the safety clip is compatible and functional during use.
- ◆ **Copper Wire Cutting Capacity (Ø0.81mm, 20 AWG):** Suitable for cutting small copper wire.

About the Flush Cutter - Long Handles

The Flush Cutter with Long Handles is a popular choice for professionals requiring more control and reduced effort during cutting tasks.

Its extended handles help reduce the force needed by the operator, ensuring comfort and precision over extended periods. With a steel thickness of 2.5mm and a tool length of 160mm, it provides strength and durability for clean, flush cuts. A safety clip is available to securely hold wire scraps after cutting, enhancing convenience and safety during use.
