

## Freezer - 400ml

SKU: 306-117

### Features & Benefits

- ◆ Ideal for detecting thermally intermittent faulty components in electronics
- ◆ Rapidly reduces component temperatures by up to -50°C
- ◆ Non-flammable, non-toxic, and odourless for safe use
- ◆ Can cool thermally sensitive parts during soldering or calibration
- ◆ Rail approved (007/020505)
- ◆ 6-year shelf life from the date of manufacture

### About the Freezer - 400ml

#### FREEZER - FAULT DETECTION FOR ELECTRONICS

Ambersil Freezer (400ml) is an essential tool for fault detection in electronics, allowing technicians to quickly identify thermally intermittent faulty components.

By rapidly reducing component temperatures by up to -50°C, it aids in pinpointing issues with precision.

This non-flammable, non-toxic, and completely odourless product is also useful for cooling thermally sensitive parts during soldering or calibration.

With a 6-year shelf life and Rail approval (007/020505), Freezer provides long-lasting, reliable performance for electronics maintenance.
