About the FumeCAB 1000 iQ

The BOFA FumeCAB 1000 iQ - is a complete cabinet fume extraction solution designed for a wide range of anti-static applications.

As partial enclosures become the recommended extraction option, this system ensures compliance with the latest regulations, including guidance from the HSE's HSG258.

The FumeCAB 1000 iQ is equipped with BOFA's iQ Operating System and ultra-bright, energy-saving LED lights as standard.

With an integrated filtration system that promotes an anti-static working environment, this fume extraction unit is perfect for applications requiring strict anti-static measures.

Optional extras include UV lighting, a VOC monitor, and a stand for added functionality.

Filters used:

- Pre Filter A1030249
- Combined Filter A0130250
