

# FumeCAB 250 Cabinet With 1.5m Install Kit

SKU: 503-585

## Features & Benefits

- ◆ Compact, versatile fume extraction cabinet for a range of applications
- ◆ Fully compliant with HSE and COSHH requirements
- ◆ Designed to extract fumes generated during hand soldering
- ◆ Includes 1.5m of 75mm flexi hose for easy setup
- ◆ LED strip light for enhanced visibility in the working area
- ◆ **1 x 75mm outlet** for easy connection to extraction units
- ◆ Recommended face velocity of 0.5m/s for optimal fume removal
- ◆ Call now to arrange your annual LEV testing on all BOFA parts

## About the FumeCAB 250 Cabinet With 1.5m Install Kit

The BOFA FumeCAB 250 Cabinet is a compact yet versatile fume extraction solution, ideal for a range of applications, particularly in environments where compliance with HSE and COSHH requirements is essential.

Designed to work seamlessly with the BOFA V250 extraction system, this cabinet effectively removes fumes generated during processes like hand soldering in the electronics industry.

The unit comes equipped with 1.5m of 75mm flexi hose and features an LED strip light for enhanced visibility.

With its hood enclosure measuring 400mm x 265mm and a recommended face velocity of 0.5m/s, the BOFA FumeCAB 250 offers efficient fume extraction in a compact design.
