

Gas Filter V600

SKU: 503-537

Features & Benefits

- ◆ **HEPA Section:** 99.97% efficiency at 0.3 microns for fine particle filtration
- ◆ **Gas Section:** Treated activated carbon for absorbing gases and vapours
- ◆ **Filter Housing:** Durable zinc-plated mild steel construction
- ◆ **Dual-Stage Filtration:** Combined particle and gas filtration for optimal air quality
- ◆ Featuring a HEPA section with 99.97% efficiency at 0.3 microns for particle removal, and a carbon section with treated activated carbon to absorb harmful gases and vapours, this filter ensures comprehensive protection

About the Gas Filter V600

The BOFA optional gas filter for the BOFA V600 fume extraction unit combines advanced HEPA and gas filtration to provide superior air quality.

Featuring a HEPA section with 99.97% efficiency at 0.3 microns for particle removal, and a carbon section with treated activated carbon to absorb harmful gases and vapours, this filter ensures comprehensive protection.

Housed in durable zinc-plated mild steel, it is an essential upgrade for enhanced filtration in high-demand environments.

Compatible with:

- BOFA V600 fume extraction unit
