

Grid Tape 12-48mm ESD

SKU: 301-003 | Sizes: 12mm, 18mm, 24mm, 48mm

Features & Benefits

- ◆ Silicone-free construction with low residues to prevent contamination
- ◆ Grid pattern includes the ESD logo in compliance with EN 61340-5 standards
- ◆ Typically used for sealing primary or intermediate packaging, ensuring safe transport and storage of electronic components
- ◆ **Surface resistance:** 10e6 to 10e9 Ω , offering reliable ESD protection
- ◆ ESD Grid Tape is made from silicone-free, low-residue polypropylene, featuring a self-adhesive backing and a static dissipative surface

About the Grid Tape 12-48mm ESD

ESD Grid Tape is made from silicone-free, low-residue polypropylene, featuring a self-adhesive backing and a static dissipative surface.

This specialised tape is designed to ensure that your sensitive electronic components are protected from electrostatic discharge (ESD) during packaging and storage, making it an ideal solution for various ESD-sensitive applications.

This ESD Grid Tape is an excellent choice for sealing packaging, ensuring static-sensitive items are protected and compliant with ESD safety standards throughout their handling and transport.

Specifications

Property	Detail
Thickness	0.06mm
Length	36m, providing ample tape for multiple applications
Application	ESD-protected areas, electronics mfg, cleanrooms
