

# Heating Element WTP 90

SKU: GW-EL-WTP90

## Features & Benefits

- ◆ Compatible with WTP 90 soldering iron
- ◆ Provides consistent heat generation for reliable soldering
- ◆ Fast heat-up time for improved efficiency
- ◆ Durable and long-lasting for professional use
- ◆ Easy installation for quick and hassle-free replacement

## About the Heating Element WTP 90

The Heating Element for WTP 90 Soldering Iron is an essential replacement part designed to restore the high performance of your Weller WTP 90 soldering iron.

This heating element provides reliable heat generation, ensuring precise temperature control and fast heat-up times for a wide range of soldering tasks. Whether you're working on intricate electronics or general soldering applications, the Heating Element for WTP 90 delivers consistent and efficient performance, helping you achieve high-quality soldering results.

Easy to install, this durable replacement part is vital for maintaining the long-term functionality and efficiency of your WTP 90 soldering iron.
