# Heating Element WXP 200

SKU: GW-EL-WXP200

## Features & Benefits

- Compatible with WXP 200 soldering iron
- Delivers consistent heat generation for reliable soldering results
- Fast heat-up time for efficient workflows
- Durable construction for long-lasting performance
- Easy installation for quick and simple replacement

## About the Heating Element WXP 200

**The Heating Element is a high-quality replacement part designed to ensure the continued peak performance of your Weller WXP 200 soldering iron.**
This heating element provides consistent and reliable heat generation, enabling precise temperature control and fast heat-up times for a wide range of soldering tasks. Whether you're working on demanding professional applications or detailed DIY projects, the Heating Element for WXP 200 ensures stable soldering performance with every use.
Easy to install, this durable replacement part is essential for extending the life of your WXP 200 soldering iron and maintaining optimal soldering results.
