

Heel Grounder with Velcro ESD

SKU: G-SH-4

Features & Benefits

- ◆ Hardwearing heel straps for long-term ESD protection and durability
- ◆ **1 Meg Ohm safety resistor** incorporated into each heel strap for reliable static discharge control
- ◆ Built for extended use in ESD-sensitive environments
- ◆ Periodic testing required using a footwear test station to ensure continued grounding effectiveness
- ◆ Ideal for electronics manufacturing, workstations, and other ESD-critical applications
- ◆ Each strap features a 1 Meg Ohm safety resistor, ensuring safe grounding and protection against electrostatic build-up

About the Heel Grounder with Velcro ESD

The **Hardwearing Heel Grounder with Velcro Strap** is designed to provide **long-term ESD protection for personnel in static-sensitive environments.**

Constructed from durable materials, these heel straps are built to withstand extended use while maintaining effective static discharge control.

Each strap features a 1 Meg Ohm safety resistor, ensuring safe grounding and protection against electrostatic build-up.

For continued reliability, the heel strap **should be periodically tested using a footwear test station** to verify its grounding performance. This heel grounder is essential for personal grounding in ESD-critical environments such as electronics manufacturing, assembly lines, and other static-sensitive areas.
