- **Silicone-Free**: These gloves are not silicone-free, making them suitable for applications where silicone contamination is not a concern.

About the Hyflex Palm-Coated Light-Duty Industrial Gloves ESD (1 Pair)

Ansell HyFlex® 48-130 Palm-Coated Light-Duty Industrial Gloves - ESD Protection & Comfort
Ensure optimal protection against electrostatic discharge (ESD) with the Ansell HyFlex® 48-130 Industrial Gloves. These light-duty gloves are designed to provide excellent durability and comfort, making them the ideal choice for workers in ESD-sensitive environments, such as electronics manufacturing and assembly lines. With their palm-coated polyurethane and seamless construction, they offer a perfect combination of static protection, strength, and comfort.
Key Features:
• **ESD Protection**: TheHyFlex® 48-130 gloves are specially designed to guard against electrostatic discharge (ESD), ensuring product protection and preventing damage to sensitive components in ESD-controlled environments.
• **Durability**: Featuring a polyurethane coating around the palm, these gloves offer robust durability, with EN level 4 abrasion resistance. Ideal for light-duty applications where wear and tear are a concern.
• **Comfort & Fit**: These gloves are seamless, providing a comfortable, snug fit. The gloves are available in a wide range of sizes to suit various hand shapes, ensuring comfort for prolonged use.
• **Breathable & Flexible**: Constructed with a nylon liner, the gloves offer breathability and flexibility, allowing for optimal dexterity and ease of movement while wearing.
• **Lightweight Design**: These gloves are light-duty, making them perfect for tasks that require fine dexterity and sensitivity, such as assembly, inspection, and electronics handling.
