

LEADED Super Deox #1 Dross Eliminator 1lb

SKU: 390-161

Features & Benefits

- ◆ **Dross Reclamation:** Reclaims up to 80% of dross into usable solder, reducing material waste and solder costs.
- ◆ **Stable & Low Fuming:** Provides a low-fume operation with no flash or fire hazards for a safer work environment.
- ◆ **High Melting Point:** Ensures effective dross removal without compromising the solder pot's temperature stability.
- ◆ **Solid White Powder:** Easy to handle and apply to your solder pot.
- ◆ **Less Alloy Waste:** Helps minimise the amount of solder alloy lost during the soldering process.
- ◆ **Indefinite Shelf Life:** The product remains effective even after opening, providing long-term value.

About the LEADED Super Deox #1 Dross Eliminator 1lb

Super Deox is a high-performance dross eliminator specially formulated for solder pots, designed to convert solder oxides (dross) back into usable solder.

By using Super Deox, you can reclaim over 80% of the dross, significantly reducing solder waste and lowering overall solder costs.

This stable, low-fuming, high-melting compound ensures safe and efficient use, with no flash or fire hazards.

The solid white powder is easy to apply and has an indefinite shelf life once opened, making it a reliable long-term solution for controlling dross accumulation.
