

L Shaped PCB Rack 38 Slots ESD

SKU: 109-100-3

Features & Benefits

- ◆ Quality manufactured PCB rack made from conductive polypropylene for ESD-safe storage of printed circuit boards (PCBs)
- ◆ Holds up to 38 PCBs for efficient PCB storage and transportation
- ◆ Slats moulded from conductive polypropylene, ensuring static protection
- ◆ Manufactured in the UK, ensuring premium quality and durability
- ◆ ESD Safe, providing a reliable solution for static-sensitive devices

About the L Shaped PCB Rack 38 Slots ESD

This quality manufactured PCB rack offers an efficient and convenient method for PCB storage in assembly areas.

Made from conductive polypropylene, the slats ensure reliable ESD protection, providing a static-safe solution for storing and transporting printed circuit boards (PCBs).

With the ability to **hold up to 38 PCBs**, this rack is ideal for both transportation and storage of static-sensitive devices.

The **dimensions of 280mm length x 406mm width x 160mm height** make it suitable for use in a variety of ESD-controlled environments.

Manufactured in the UK, this ESD-safe PCB rack complies with industry standards, offering durability and reliability for your electronics assembly and manufacturing processes.

Specifications

Property	Detail
Dimensions	280mm length x 406mm width x 160mm height, ideal for assembly areas and ESD-controlled environments
Application	ESD-protected areas, electronics mfg, cleanrooms
