

L Shaped PCB Rack 48 Slots

SKU: 109-103

Features & Benefits

- ◆ UK manufactured
- ◆ Strong, rigid construction
- ◆ Moulded from black conductive polypropylene
- ◆ **Electrical resistance:** 10^3 to $10^5 \Omega$
- ◆ Stackable for space efficiency
- ◆ Ideal for storage, transport, and repair of PCBs
- ◆ RoHS and REACH compliant

About the L Shaped PCB Rack 48 Slots

UK-manufactured conductive PCB racks offer a durable and efficient solution for storing, transporting, and handling PCBs or CMOS-assembled boards in static-controlled environments.

Moulded from rigid, carbon-loaded black conductive polypropylene, these racks ensure safe ESD protection with an electrical resistance of 10^3 to $10^5 \Omega$.

Designed for convenience, they are stackable for space-saving storage and suitable for use during maintenance, repair, and within assembly areas. They support boards up to 3.0mm thick and are compliant with IEC-61340-5-1, RoHS, and REACH standards.

Specifications

Property	Detail
Maximum board thickness	3.0mm
Dimensions	406 x 275 x 150mm (48 slots)
Operating temperature	up to 75°C
Application	ESD-protected areas, electronics mfg, cleanrooms
