About the Latex Powder Free Gloves MEDICAL GRADE (100 Gloves)

Latex Powder-Free Medical Grade Gloves offer superior protection and comfort, making them ideal for medical and healthcare applications.

Manufactured from natural latex, these gloves provide maximum dexterity and sensitivity, giving you a near skin-like touch while ensuring reliable protection against a variety of substances. With textured fingertips for enhanced grip, these ambidextrous gloves are designed for easy donning without the need for powder.

Certified medical grade (EN455, EN374, Category III) and food-approved, they offer excellent fit and feel in a wide range of settings. Supplied in **boxes of 100 gloves (50 pairs)**, they offer a practical and high-quality solution for professional use.
