

Lead Free Solder Pellets 1Kg

SKU: GES-G237-C

Features & Benefits

- ◆ **Lead-free alloy:** 99.0% Tin, 0.3% Silver, 0.7% Copper
- ◆ **Melting range:** 217 - 227°C for reliable soldering
- ◆ **High purity:** Made from virgin materials for optimal performance
- ◆ **Ideal for use with soldering/tinning pots** for easy application
- ◆ **Electronic-grade tin solder** for precise and professional work
- ◆ **Supplied in 1Kg quantity** for convenience

About the Lead Free Solder Pellets 1Kg

The **Lead-Free Solder Pellets (1Kg)** are designed for use with soldering or tinning pots, offering a high-quality, environmentally friendly alternative to traditional lead-based solder.

Made from a lead-free alloy of 99.0% Tin, 0.3% Silver, and 0.7% Copper, these pellets are ideal for electronic applications that require high purity and performance. With a melting range of 217 - 227°C, they ensure smooth, reliable soldering.

These electronic-grade tin solders are produced using virgin materials, ensuring the highest quality and consistency for professional use.
