

Natural Bristle PCB Cleaning Brush NON ESD

SKU: 107-165

Features & Benefits

- ◆ Natural bristles for effective yet gentle cleaning of PCBs and electronic components
- ◆ Perfect for cleaning PCBs, SMT assemblies, and other sensitive electronic components
- ◆ Suitable for applications where ESD protection is not required

About the Natural Bristle PCB Cleaning Brush NON ESD

Natural Bristle PCB Cleaning Brush - NON ESD – Precision Cleaning for Electronics

The Natural Bristle PCB Cleaning Brush - **NON ESD** is designed for cleaning printed circuit boards (PCBs) and other delicate components where ESD control is not a primary concern. Made with natural bristles, this brush provides a gentle yet effective cleaning solution for sensitive surfaces, ideal for removing dust, flux residue, and other contaminants that can affect the functionality of electronic devices. With a brush length of 105mm, this compact and easy-to-handle brush allows for precision cleaning, while the bristle dimensions (5 x 16 x 12mm) offer the perfect balance of flexibility and durability to ensure thorough cleaning without causing damage.

Specifications

Property	Detail
Brush Length	105mm
Dimensions	5 x 16 x 12mm
Application	ESD-protected areas, electronics mfg, cleanrooms
