

PCB Buffer

SKU: 601-636

Features & Benefits

- ◆ **Easy Operation:** User-friendly Touch Screen Controller
- ◆ **Panasonic PLC Control System:** Delivers consistent and reliable performance
- ◆ **Fast, Smooth, and Precise Search and Location:** Optimises PCB handling
- ◆ **Full Closed Design:** Ensures a high level of safety for operators
- ◆ **Smaller Footprint:** Ideal for space-constrained environments
- ◆ **SMEMA Compatible:** Compatible with other equipment for seamless integration
- ◆ Featuring a "soft touch" LED membrane control panel and a Touch Screen Controller, this buffer is easy to operate, making it ideal for environments that require fast and precise PCB management

About the PCB Buffer

The PCB Buffer is a highly efficient, user-friendly solution designed to streamline PCB handling.

Featuring a "soft touch" LED membrane control panel and a Touch Screen Controller, this buffer is easy to operate, making it ideal for environments that require fast and precise PCB management.

Powered by a Panasonic PLC control system, it provides reliable and smooth operation for all your PCB buffering needs.

With a compact design and SMEMA compatibility, it integrates seamlessly into your production line while ensuring a safe and secure operation.

Specifications

Property	Detail
Dimensions	535 x 844 x 1250mm (LxWxH)
Application	ESD-protected areas, electronics mfg, cleanrooms
