

PS-01 Miniature Long Nose Pliers ESD

SKU: 201-303

Features & Benefits

- ◆ **Type:** Miniature long nose pliers with integral cutting jaws
- ◆ **ESD Safe:** Thermoplastic elastomer (TPR) handle for protection against electrostatic discharge
- ◆ **Serrated Jaws:** Provides a strong grip on components
- ◆ **Hardness:** HRC 58±4 for durability
- ◆ **Coiled Spring:** Ensures smooth, effortless operation
- ◆ The pliers feature serrated jaws for a firm grip on components and integral cutting jaws capable of cutting 2mm copper wire

About the PS-01 Miniature Long Nose Pliers ESD

The PS-01 Miniature Long Nose Pliers ESD are professional-grade pliers designed by a renowned Japanese engineering tool company.

These pliers are ideal for working on printed circuit boards (PCBs) and provide precise handling and cutting capabilities. With ESD-safe thermoplastic elastomer (TPR) handles, they protect sensitive electronic components from electrostatic discharge.

The pliers feature serrated jaws for a firm grip on components and integral cutting jaws capable of cutting 2mm copper wire. A coiled spring enhances ease of use, and their durable construction ensures long-lasting performance.

Specifications

Property	Detail
Cutting Capacity	Can cut 2mm copper wire
Material	Made from high-quality S58C steel
Size	125mm long
Weight	68g for lightweight handling
Application	ESD-protected areas, electronics mfg, cleanrooms
