

PS-03 Miniature Needle Nose Pliers ESD

SKU: 201-305

Features & Benefits

- ◆ **Type:** Miniature needle nose pliers with half-round shaped long nose
- ◆ **ESD Safe:** Thermoplastic elastomer (TPR) handles to prevent electrostatic discharge
- ◆ **Ideal for Forming Work:** Half-round shaped jaws are perfect for shaping and bending wire
- ◆ **Hardness:** HRC 46±4 for optimal strength and durability
- ◆ **Coiled Spring:** Ensures smooth operation with minimal effort
- ◆ **Precision & Reliability:** Japanese engineering known for dependability

About the PS-03 Miniature Needle Nose Pliers ESD

The PS-03 Miniature Needle Nose Pliers ESD are professional-grade pliers from a highly respected Japanese engineering tool company, designed for precision work in electronics and other detailed tasks.

Featuring a half-round shaped long nose, these pliers are ideal for forming work, making them perfect for tasks like bending and shaping wire. With ESD-safe thermoplastic elastomer (TPR) handles, they protect sensitive electronic components from electrostatic discharge. The pliers have no serration inside the jaws for a smooth, clean operation. Their coiled spring provides ease of use and reduces hand fatigue.

Specifications

Property	Detail
Material	Made from high-quality S58C steel
Size	125mm long for precise control
Weight	66g for lightweight handling
Application	ESD-protected areas, electronics mfg, cleanrooms
