

PS-04 Miniature Flat Nose Pliers ESD

SKU: 201-304

Features & Benefits

- ◆ **Type:** Miniature flat nose pliers with extra-fine square tip
- ◆ **ESD Safe:** Thermoplastic elastomer (TPR) handles to prevent electrostatic discharge
- ◆ **Precision:** Extra-fine square tip for accurate and delicate PCB work
- ◆ **Hardness:** HRC 46±4 for reliable performance
- ◆ **Coiled Spring:** Ensures smooth operation with minimal effort
- ◆ **Japanese Engineering:** Known for precision, reliability, and dependability
- ◆ These pliers feature an extra-fine square tip for precise gripping, making them perfect for fine adjustments and delicate tasks on PCBs

About the PS-04 Miniature Flat Nose Pliers ESD

The PS-04 Miniature Flat Nose Pliers ESD are precision-crafted tools from a renowned Japanese engineering company, ideal for detailed work on printed circuit boards (PCBs).

These pliers feature an extra-fine square tip for precise gripping, making them perfect for fine adjustments and delicate tasks on PCBs. The ESD-safe thermoplastic elastomer (TPR) handles provide protection against electrostatic discharge, ensuring the safety of sensitive components. With a coiled spring for ease of use and a lightweight design, these pliers combine Japanese engineering precision with reliability.

Specifications

Property	Detail
Material	High-quality S58C steel for strength and durability
Size	115mm long, offering excellent control and precision
Weight	69g for easy handling and comfort
Application	ESD-protected areas, electronics mfg, cleanrooms
