

# Piergiacomini ESD Distance Cutter 1.5mm

SKU: GT-TR5000-15-ESD

## Features & Benefits

- ◆ **Front cut design:** Cuts component leads precisely at 1.5mm from the surface
- ◆ **Steel thickness:** 5mm for enhanced durability and strength
- ◆ **Tool length:** 147mm, ideal for precision work in difficult-to-reach areas
- ◆ **ESD-safe:** Protects electronic components from static damage
- ◆ **Perfect for tight spaces:** Designed for clean and accurate cuts in confined or challenging environments

## About the Piergiacomini ESD Distance Cutter 1.5mm

The Piergiacomini ESD Distance Cutter 1.5mm is a high-precision tool designed for front cutting in tight, hard-to-reach areas. It allows for accurate trimming of component leads to a clean 1.5mm from the surface, ensuring minimal disruption to surrounding components.

The cutter features a robust 5mm steel thickness and a 147mm tool length, providing strength and manoeuvrability in confined spaces. Its ESD-safe construction protects sensitive electronic components from static discharge, making it a reliable choice for precise electronic assembly and maintenance.
