

Piergiacomini ESD Distance Cutter 1mm

SKU: GT-TR5000-10-ESD

Features & Benefits

- ◆ **Front cut design:** Ideal for cutting component leads to 1mm from the surface
- ◆ **Steel thickness:** 5mm for strength and durability
- ◆ **Tool length:** 147mm for precise handling in tight spaces
- ◆ **ESD-safe:** Protects electronic components from static damage
- ◆ **Ideal for difficult access areas:** Perfect for working in confined spaces or with small components

About the Piergiacomini ESD Distance Cutter 1mm

The Piergiacomini ESD Distance Cutter 1mm is a high-quality tool designed for precise front cuts, especially useful in tight or hard-to-reach areas.

This cutter is ideal for trimming component leads to a clean 1mm length from the surface, ensuring minimal damage and maximum accuracy.

With a steel thickness of 5mm and a tool length of 147mm, this cutter offers durability and a comfortable grip. The ESD-safe construction ensures protection against static discharge, making it a reliable choice for sensitive electronic work.
