

## Pre Filter (F8)

SKU: 503-375

### Features & Benefits

- ◆ **Filter Media:** Maxi pleat glass fibre with glue bead spacers for optimal filtration
- ◆ **Filter Efficiency:** 95% at 0.9 microns for superior dust and particle capture
- ◆ **Filter Housing:** Durable Zintec mild steel for added protection and longevity
- ◆ **Single-stage filtration:** Provides essential filtration for the AM 400 units

### About the Pre Filter (F8)

The BOFA F8 Main Filter for the AM 400 is a highly effective filtration solution for the AM 400 BOFA extraction units.

Constructed with maxi pleat glass fibre and glue bead spacers, this filter offers a high efficiency of 95% at 0.9 microns, ensuring the capture of fine particles and airborne contaminants.

Housed in durable Zintec mild steel, this filter provides reliable performance and easy maintenance for a cleaner, safer work environment.

**Compatible with:**

- AM 400
