

## Pre Filter (H14)

SKU: 503-376

### Features & Benefits

- ◆ **Filter Media:** Maxi pleat glass fibre with glue bead spacers for maximum filtration efficiency
- ◆ **Filter Efficiency:** 99.997% at 0.3 microns for superior particle capture
- ◆ **Filter Housing:** Sturdy Zintec mild steel for enhanced durability
- ◆ **Single-stage filtration:** Provides complete filtration for the AM 400 unit
- ◆ Designed as the sole stage of filtration, this filter features a maxi pleat glass fibre construction with glue bead spacers for optimal airflow and particle retention

### About the Pre Filter (H14)

The BOFA H14 High Efficiency Main Filter (A1030462) for the AM 400 Extractor delivers exceptional filtration performance, capturing fine particles with an impressive 99.997% efficiency at 0.3 microns.

Designed as the sole stage of filtration, this filter features a maxi pleat glass fibre construction with glue bead spacers for optimal airflow and particle retention.

Housed in robust Zintec mild steel, it ensures long-lasting durability and reliable performance for a cleaner and safer working environment.

**Compatible with:**

- AM 400
