

Premium - Horse Hair Brush ESD

SKU: 107-161

Features & Benefits

- ◆ Double-ended applicator brush with horse hair bristles for safe cleaning in ESD-sensitive environments
- ◆ One end with a flat trim for precision work and the other with an extra-stiff chiselled trim for tough jobs
- ◆ ESD Safe, preventing the generation of harmful static charges
- ◆ Lightweight zinc-plated steel handle for durability and ease of use
- ◆ Strong mechanical clamping for maximum fibre retention, adhesive-free to avoid contamination
- ◆ Ideal for removing solder balls, cleaning electronic assemblies, and static-sensitive tasks
- ◆ One end features a flat trim, perfect for precision cleaning, while the other end has an extra-stiff chiselled trim for tougher jobs, offering flexibility and control

About the Premium - Horse Hair Brush ESD

Premium Horse Hair Brush ESD – Dual-End Applicator for Static-Sensitive Cleaning

The Premium Horse Hair Brush ESD is a versatile, double-ended applicator brush designed for use in ESD-sensitive environments, where electrostatic discharge (ESD) protection is critical. With its horse hair bristles, this brush ensures safe cleaning without the risk of generating static charges, making it ideal for delicate tasks such as cleaning electronic assemblies and removing solder balls.

One end features a flat trim, perfect for precision cleaning, while the other end has an extra-stiff chiselled trim for tougher jobs, offering flexibility and control. This brush is a reliable alternative to hand-trimming acid brushes, providing excellent performance and durability.

Made with a lightweight zinc-plated steel handle, the brush is both sturdy and comfortable to use. The brush is manufactured using strong mechanical clamping, which ensures maximum fibre retention while being adhesive-free to prevent contamination from leaching. This makes it an excellent choice for static-controlled environments where cleanliness and precision are essential.

With an overall length of 130mm, a bristle width of 7mm, a bristle length of 11mm, and a bristle height of 7mm, this brush is the perfect tool for safe and effective cleaning without compromising on ESD protection.

Specifications

Property	Detail
Overall Length	130mm
Application	ESD-protected areas, electronics mfg, cleanrooms
