

Premium - Horse Hair Nail Brush ESD

SKU: 107-180

Features & Benefits

- ◆ Anti-static horse hair bristles to prevent electrostatic discharge (ESD)
- ◆ Medium-sized with an 8 x 16 row configuration and a 24mm (15/16") trim for precision cleaning
- ◆ Static-neutral hardwood block with a finger-grip recess for easy handling
- ◆ Ideal for scrubbing hands, nails, and small areas in ESD-sensitive environments
- ◆ Perfect for use in electronics and electrical industries, and other static controlled areas
- ◆ The brush features anti-static horse hair bristles, ensuring that it does not contribute to electrostatic discharge (ESD), making it ideal for delicate tasks where static control is crucial

About the Premium - Horse Hair Nail Brush ESD

The Premium Horse Hair Nail Brush ESD is expertly crafted for use in static-sensitive environments, such as electronics and electrical industries. The brush features anti-static horse hair bristles, ensuring that it does not contribute to electrostatic discharge (ESD), making it ideal for delicate tasks where static control is crucial.

This medium-sized brush comes with a static-neutral hardwood block and a convenient finger-grip recess, providing a comfortable and controlled cleaning experience. The brush is designed with an 8 x 16 row configuration and a 24mm (15/16") trim, offering precision and flexibility for scrubbing hands, nails, and small areas with ease.

With a block length of 114mm (4-1/2"), a brush face length of 108mm (4-1/4"), and a brush face width of 38mm (1-1/2"), this nail brush strikes the perfect balance between size and efficiency, making it an essential tool for maintaining hygiene and cleanliness in ESD-controlled environments.

Specifications

Property	Detail
Block Length	114mm (4-1/2")
Application	ESD-protected areas, electronics mfg, cleanrooms
