

Premium - Stiff Hog Hair Toothbrush ESD

SKU: 107-151

Features & Benefits

- ◆ Triple-row brush (3 x 7 row configuration) for powerful and precise scrubbing
- ◆ Made with natural stiff hog hair bristles for tough cleaning tasks, including sticky or crusty materials
- ◆ Strong plywood handle provides durability and comfortable handling
- ◆ Securely clamped bristles eliminate bristle loss and prevent contamination in ESD-controlled environments
- ◆ Ideal for scratching surfaces and general cleaning in static-sensitive areas

About the Premium - Stiff Hog Hair Toothbrush ESD

Premium Stiff Hog Hair Toothbrush ESD – High-Performance Cleaning for Static-Sensitive Environments

The Premium Stiff Hog Hair Toothbrush ESD is a heavy-duty cleaning brush designed for static-sensitive environments where electrostatic discharge (ESD) protection is essential. Featuring natural stiff hog hair bristles, this brush is perfect for scratching surfaces, general cleaning, and tackling sticky or crusty materials without generating harmful static charges.

With a triple-row configuration of 3 x 7 rows, the brush provides powerful scrubbing action and excellent precision for cleaning tough materials. The stiff hog hair bristles are securely clamped into a strong plywood handle, ensuring minimal bristle loss and preventing contamination, making it suitable for use in ESD-controlled environments where cleanliness and static safety are paramount.

The long plywood handle offers comfortable handling, even for more intensive cleaning tasks, while the stiff bristles provide the strength necessary for cleaning stubborn dirt and debris, including sticky or crusty residues. This high-quality brush is an ideal tool for precision cleaning of components such as printed circuit boards (PCBs) and other sensitive equipment.

Specifications

Property	Detail
Handle Length	195mm
Application	ESD-protected areas, electronics mfg, cleanrooms
