

QUICK 100-6C Lead Free Solder Pot (400 Watt)

SKU: GQ-100-6C

Features & Benefits

- ◆ **Heating Power:** 400W for fast heating and stable temperature maintenance.
- ◆ **Titanium Alloy Pot:** Durable, corrosion-resistant, and long-lasting.
- ◆ **Closed-Loop Temperature Control:** Ensures accurate and stable temperature.
- ◆ **Digital Temperature Calibration:** Provides precise control and easy adjustment.
- ◆ **Anti-Erosion Alloy Materials:** Enhances lifespan and resistance to wear.
- ◆ **Portable and Convenient:** Compact and easy to use for various soldering applications.
- ◆ **Rapid Temperature Rise:** Quickly reaches the desired soldering temperature.

About the QUICK 100-6C Lead Free Solder Pot (400 Watt)

The Quick 100-6C Lead Free Solder Pot is an efficient, portable solution for melting solder and tinning component ends and wire leads.

Designed with a titanium alloy pot (Φ54mm * 38mm), it ensures excellent durability and resistance to erosion.

With a 400W heating power and a temperature range of 150°C to 450°C, this solder pot heats up rapidly and maintains a stable, accurate temperature, perfect for lead-free soldering applications. Its closed-loop sensor ensures precise temperature control and long-lasting performance, making it an ideal tool for both professional and DIY soldering projects.

Specifications

Property	Detail
Temperature Range	150°C to 450°C, suitable for lead-free soldering
Application	ESD-protected areas, electronics mfg, cleanrooms
