

# QUICK Soldering Thermometer

SKU: GQ-191AD

## Features & Benefits

- ◆ High-precision CA sensor (Dia 0.2mm) for accurate tip temperature measurement
- ◆ Auto shut-off function with adjustable shut-off time for energy efficiency
- ◆ Max temperature memory with [MAX HOLD] button for easy retrieval
- ◆ Interchangeable between Celsius and Fahrenheit
- ◆ Powered by a 9V battery (included)
- ◆ **Compact design:** 85(W) x 35(H) x 147(D) mm, weighing approximately 250g
- ◆ **Operating temperature range:** 0-40°C
- ◆ **Replacement sensors available for continued use**
- ◆ With a user-friendly interface, it features an auto shut-off function that can be customised to save power, turning the device off after a set period of inactivity

## About the QUICK Soldering Thermometer

The Quick Soldering Thermometer is designed to quickly and accurately measure the temperature of soldering tips using a high-precision CA sensor (Dia 0.2mm).

With a user-friendly interface, it features an auto shut-off function that can be customised to save power, turning the device off after a set period of inactivity.

The thermometer also records the maximum temperature reached, easily displayed when the [MAX HOLD] button is pressed.

Celsius and Fahrenheit units are interchangeable, making it versatile for different users.

Powered by a 9V battery, it's an essential tool for ensuring accurate soldering temperatures.
