

# Qualitek 300A Flux Thinners 1 Litre

SKU: 390-300-01L

## Features & Benefits

- ◆ **IPA-based formula** for effective flux thinning
- ◆ **Optimises specific gravity** of fluxes for better consistency
- ◆ **Designed for use with Foam Fluxer applications** in wave solder machines
- ◆ Compatible with Qualitek 392-35 and Qualitek 392 fluxes
- ◆ Not required for Spray Fluxer applications
- ◆ **Supplied in 1 Litre containers** for convenience

## About the Qualitek 300A Flux Thinners 1 Litre

Qualitek 300A Flux Thinners (1 Litre) is an IPA-based solution designed to control the specific gravity of fluxes, particularly for use in wave solder machines with Foam Fluxer applications.

This high-performance thinner is compatible with Qualitek 392-35 and Qualitek 392 fluxes, helping to optimise their performance and consistency during the soldering process.

It is **not required for use with spray fluxer**, making it an ideal choice for foam fluxing systems that demand precise flux control for improved results.

## Specifications

Property	Detail
Application	ESD-protected areas, electronics mfg, cleanrooms
