

Qualitek 700A Flux Thinners 1Litre

SKU: 390-700-1

Features & Benefits

- ◆ **Designed for Foam Fluxer applications** in wave solder machines
- ◆ **Controls specific gravity** of Qualitek 735-11 and 737N Water Soluble Fluxes
- ◆ Not required for spray fluxers
- ◆ **Supplied in 1 Litre containers** for convenience and extended use

About the Qualitek 700A Flux Thinners 1Litre

Qualitek 700A Flux Thinners (1 Litre) are specifically designed for use with wave solder machines using Foam Fluxer applications.

These thinners are ideal for controlling the specific gravity of various fluxes, including Qualitek 735-11 Water Soluble Flux and Qualitek 737N Water Soluble Flux Neutral.

By adjusting the specific gravity, they ensure optimal flux performance during the soldering process.

These thinners are **not required for spray fluxers**, making them perfect for foam fluxing systems that demand precise flux control for improved soldering results.
