

Qualitek 737N Water Soluble Flux LEAD FREE 1Litre

SKU: 390-737-1

Features & Benefits

- ◆ **Neutral, water-removable flux** for easy cleaning
- ◆ **Organic activating system** with neutral pH at room temperature
- ◆ **Effective over a broad preheat range** for versatile use
- ◆ Compatible with both leaded and lead-free solder systems
- ◆ **Excellent wettability** for smooth, efficient soldering
- ◆ **Yields bright, shiny joints** for a professional finish
- ◆ Suitable for both foam and spray applications
- ◆ **Supplied in 1 Litre containers** for convenience

About the Qualitek 737N Water Soluble Flux LEAD FREE 1Litre

Qualitek 737N Water Soluble Flux (1 Litre) is a neutral, water-removable soldering flux designed for wave soldering applications on both conventional and surface mount PCB assemblies.

Featuring an organic activating system with a **neutral pH** at room temperature, it activates at soldering temperatures, providing excellent wettability and soldering performance.

This versatile flux is compatible with both leaded and lead-free solder systems and works well over a broad preheat range.

It is ideal for foam and spray applications, yielding bright, shiny solder joints with minimal residue.
