

# Qualitek PF700 Water Soluble Paste Flux

SKU: 390-8 | Sizes: 13g/10cc Syringe, 40g/30cc Syringe

## Features & Benefits

- ◆ **Water Soluble:** Post-soldering residues can be easily removed with water, ensuring a clean finish.
- ◆ **Excellent Tack Properties:** Provides strong adhesion to components during the soldering process.
- ◆ **Versatile Application:** Can be brushed or dispensed onto areas needing repair or touch-up.
- ◆ **Ideal for SMD Repair:** Perfect for reworking surface-mount devices (SMDs) during assembly.
- ◆ **Convenient Heating:** Compatible with conventional heating methods for effective reflow.
- ◆ **Sample Requests:** Available for registered users to evaluate the product.

## About the Qualitek PF700 Water Soluble Paste Flux

Qualitek PF700 Water Soluble Paste Flux is a high-performance flux designed for touch-up and repair of surface-mount assemblies.

Formulated with a mixture of organic acids, thixotropic thickeners, and surfactants, it provides excellent tack properties and aids in the easy removal of post-soldering residues with water. This versatile paste flux can be applied by brushing or dispensing onto the required areas and then heated using conventional methods.

**Sample Requests are available to registered users.**
