

Quick 861 PRO Rework Station

SKU: GQ-861-PRO

Features & Benefits

- ◆ 1300W heating power with 50°C – 550°C temperature range
- ◆ Intelligent PID linear temperature control for accuracy and stability
- ◆ **Brushless vortex blower:** long lifespan, low noise, powerful airflow
- ◆ Automatic high-airflow cool down to prolong heater and hand-piece life
- ◆ HD colour display with dynamic temperature readout
- ◆ Four programmable channels for quick setup
- ◆ Compact, ergonomic hand-piece for comfortable non-contact heating
- ◆ Voice Control
- ◆ Set your airflow and temperature with the four regular channels "CH1, CH2, CH3, CH4."
- ◆ Maximum airflow of 70 L/min
- ◆ Adjustable air volume (1–200 levels)

About the Quick 861 PRO Rework Station

The Quick 861 PRO is a professional 1300W intelligent hot air rework station designed for precise and efficient desoldering.

It offers a wide adjustable temperature range of 50°C to 550°C, controlled by advanced PID technology for accurate, stable heat. The brushless vortex blower delivers powerful airflow with low noise and long service life, while the compact, ergonomic hand-piece ensures comfortable, expert non-contact heating.

An HD colour display provides a clear dynamic temperature readout, and the unit features automatic high-airflow cool down to protect the hand-piece and extend heater life. Four programmable channels and intuitive controls make operation fast and convenient.

Specifications

Property	Detail
Operating voltage	AC 220 V
Dimensions	214 x 235 x 159 mm
Weight	approx. 4.3 kg
Application	ESD-protected areas, electronics mfg, cleanrooms
