

Quick TR1100 Rework Station (180W)

SKU: GQ-TR1100

Features & Benefits

- ◆ **Ergonomic Design:** The new, user-friendly design reduces operator fatigue, making it ideal for long working hours.
- ◆ **Brilliant LCD Display:** Clear, easy-to-read display for real-time monitoring of temperature and airflow, improving the overall user experience.
- ◆ **PC Communication Capability:** The TR1100 can be connected to a PC for enhanced control, data management, and monitoring, making it versatile for a range of professional applications.
- ◆ **Multi-Point Digital Temperature Calibration:** Allows precise temperature control, with the ability to lock settings with a password to prevent unauthorised adjustments.
- ◆ **Three Memory Banks:** Store and quickly recall up to three sets of soldering parameters for improved workflow and consistency.
- ◆ **Temperature Limit Alarm:** Alerts the user when the temperature exceeds the set limits, enhancing safety and preventing damage to sensitive components.
- ◆ **Celsius/Fahrenheit Interchangeable:** Easy switching between temperature scales for user convenience.
- ◆ **Twin-Stage Brushless Blower Pump:** Provides stable, adjustable airflow with smooth, consistent performance, ensuring efficient rework and soldering.
- ◆ **Customisable Airflow & Working Time:** Set parameters for both airflow and working time, in addition to temperature, for precise, tailored results.
- ◆ **ESD Safe Design:** Protects against electrostatic discharge, ensuring safe use with sensitive electronic components.
- ◆ **Compatible with TRS30A Hot Air Soldering Pencil:** Use with the TRS30A Hot Air Soldering Pencil and H617A Heating Element for ergonomic and flexible rework operations.
- ◆ The TR1100 features an all-new ergonomic design, a brilliant LCD display, and PC communication capability, making it an excellent choice for precise and efficient work in electronic component assembly and repair

About the Quick TR1100 Rework Station (180W)

The Quick TR1100 Rework Station is a compact, intelligent lead-free rework station, designed for professional soldering, desoldering, and rework tasks.

With a robust 180W power supply, this system delivers consistent performance, even for high-temperature solder rework applications. The TR1100 features an all-new ergonomic design, a brilliant LCD display, and PC communication capability, making it an excellent choice for precise and efficient work in electronic component assembly and repair.

Compatible with:

- TRS30A Hot Air Soldering Pencil
- H617A Heating Element
- QUICK TR1100 Hot Air Nozzles

Specifications

Property	Detail
Power Supply	180W
Application	ESD-protected areas, electronics mfg, cleanrooms
