

# Quick TS1200 - Power Unit

SKU: GQ-TS1200-PU

## Features & Benefits

- ◆ **Brilliant LCD Display:** Clear, easy-to-read interface for accurate temperature control.
- ◆ **Three-Channel Parameter Preset:** Enables storage of process parameters for quick recall.
- ◆ **Real-Time Temperature Monitoring:** Ensures precise soldering with rapid thermal recovery.
- ◆ **Temperature Alarm Function:** Alerts when set temperature limits are exceeded.
- ◆ **°C and °F Interchangeable:** Flexible temperature unit settings to suit user preference.
- ◆ **Easy Tip Replacement:** Simple, quick change of tips for minimal downtime.
- ◆ **ESD Safe:** Ensures safe, controlled operation for sensitive components.
- ◆ **ESD Monitoring Function:** Tracks electrostatic discharge levels for enhanced safety.
- ◆ With an easy tip replacement feature and ESD safety, the Quick TS1200 is a reliable solution for meeting the everyday challenges of professional soldering tasks

## About the Quick TS1200 - Power Unit

The Quick TS1200 Power Unit is an intelligent 120W power supply designed to deliver high-performance soldering capabilities. Featuring a brilliant LCD display, it offers real-time temperature monitoring and rapid thermal recovery to ensure optimal soldering performance.

The unit supports preset process parameters in three channels, making it highly practical for various applications. With an easy tip replacement feature and ESD safety, the Quick TS1200 is a reliable solution for meeting the everyday challenges of professional soldering tasks.

### Compatible with:

- Soldering Pencil TSS30B
- TS1200D Intelligent Soldering Station SET

## Specifications

Property	Detail
Power Supply	120W
Application	ESD-protected areas, electronics mfg, cleanrooms
