

Quick TS2200 - Power Unit

SKU: GQ-TS2200-PU

Features & Benefits

- ◆ **LCD Display:** Provides clear and precise temperature control and settings.
- ◆ **Three-Channel Parameter Preset:** Enables quick switching between different soldering settings.
- ◆ **Real-Time Temperature Monitoring:** Tracks tip temperature for efficient thermal recovery.
- ◆ **Temperature Alarm Function:** Alerts when the tip temperature exceeds set limits.
- ◆ **°C and °F Interchangeable:** Switch between Celsius and Fahrenheit for convenience.
- ◆ **Easy Tip Replacement:** Quick and simple tip changes for uninterrupted work.
- ◆ **ESD Safe:** Ensures safe operation with electrostatic discharge protection.
- ◆ **ESD Monitoring Function:** Monitors and controls electrostatic discharge levels for added safety.
- ◆ Featuring a brilliant LCD display, this unit allows for clear and accurate temperature control

About the Quick TS2200 - Power Unit

The Quick TS2200 Power Unit is an intelligent 90W power supply designed to tackle a wide range of soldering tasks with ease. Featuring a brilliant LCD display, this unit allows for clear and accurate temperature control. It supports three-channel preset parameters, enabling quick access to different soldering settings. Real-time temperature monitoring ensures optimal performance, with rapid thermal recovery for seamless soldering.

The Quick TS2200 also offers easy tip replacement, ESD safety, and an ESD monitoring function, making it a reliable choice for professional and everyday soldering needs.

Compatible with:

- Soldering Pencil TSS31A
- TS2200D Intelligent Soldering Station SET

Specifications

Property	Detail
Power Supply	90W
Application	ESD-protected areas, electronics mfg, cleanrooms
