- ◆ Rear Support Posts are required for installation, available in 2 different heights
- ◆ Enables easy sliding and adjustment of modules
- ◆ Optimises workspace organisation and accessibility
- ◆ Flexible and customisable solution for efficient storage management

About the Rear Accessory Rails

The Rear Accessory Rails offer a unique track system designed to effortlessly slide and support various rear accessory modules.

These rails are essential for organising and customising your workspace, allowing easy attachment and detachment of modules such as the louvre panel, pin board, parts storage, and tool panel.

To install the rear accessory rails, **Rear Support Posts are required**, available in two different heights for flexibility.

This modular system enhances workspace organisation, maximises efficiency, and provides operators with a versatile, adaptable storage solution.
