- ◆ **Available modules:** louvre panel, pin board, parts storage, and tool panel
- ◆ Offers maximum flexibility for customising workstation setups
- ◆ Enhances workspace organisation and efficiency
- ◆ Perfect for streamlining operations and keeping tools and components within easy reach

About the Rear Panel Module - Cable Reel Unit

The Rear Panel Modules – Cable Reel Unit offers a versatile and flexible solution for enhancing workstation organisation.

Required to work with rear accessory rails, this unique track system allows various modules, such as the louvre panel, pin board, parts storage, and tool panel, to be easily added or removed.

This modular system provides maximum flexibility for operators, enabling them to customise their workstation setup based on specific needs.

Ideal for improving efficiency and keeping tools and components organised, the Cable Reel Unit is an essential addition to any workspace.
