

Red Litho Antistatic Tape ESD

SKU: 301-00 | Sizes: 12mm, 25mm

Features & Benefits

- ◆ Antistatic properties for safe handling of sensitive components
- ◆ Ideal for general sealing and lithographic applications
- ◆ Bio-degradable material, eliminating the need for special waste disposal
- ◆ No curling effect for easy handling and precise application
- ◆ Hand-tearable for convenience and ease of use
- ◆ **Backing material:** Cellophane
- ◆ Coated with transparent rubber resin adhesive for strong and residue-free bonding
- ◆ **Total thickness:** 60 µm

About the Red Litho Antistatic Tape ESD

This Red Antistatic Tape is a versatile solution, ideal for general sealing applications as well as lithographic tasks.

Its antistatic properties make it particularly suitable for delicate jobs, ensuring safe handling without the risk of electrostatic discharge. The tape's bio-degradable composition means it requires no special waste handling precautions, making it an eco-friendly choice.

The cellophane backing material ensures smooth application with no curling effect, and the tape can be easily torn by hand for convenience. It is coated with a transparent rubber resin adhesive, offering strong adhesion without leaving residue.

This red antistatic tape offers a reliable, eco-friendly, and user-friendly solution for a variety of tasks that require both static protection and easy application.

Specifications

Property	Detail
Reel Length	66M
Application	ESD-protected areas, electronics mfg, cleanrooms
