

Red and White Hazard Marking Tape

SKU: G-TAPE-D

Features & Benefits

- ◆ Highly visible red and white colour for clear hazard marking
- ◆ Made from durable plasticised film with aggressive adhesive
- ◆ **Elongation at break:** 150% for added flexibility
- ◆ **Adhesion to steel and self:** 2.0N/10mm
- ◆ **Water extract pH range:** 6.0 to 8.0, Conductivity max 2.5mS/m
- ◆ Shelf life of 12 months for lasting use and storage flexibility

About the Red and White Hazard Marking Tape

Red and White Hazard Marking Tape is designed for high visibility and safety in EPA areas, providing a clear indication of hazardous zones.

Constructed from heavy-duty plasticised film and coated with a strong pressure-sensitive adhesive, this tape ensures long-lasting adhesion and durability.

The 50mm width and 33-metre length make it suitable for a range of industrial and commercial applications. With excellent tensile strength, elongation, and adhesion to both steel and itself, this tape offers reliable performance in challenging environments.

It's water-resistant, conductive, and operates effectively within a wide range of temperatures, making it ideal for safety marking in any setting.

Specifications

Property	Detail
Tape width	50mm
Thickness	0.15mm
Temperature	0°C
Application	ESD-protected areas, electronics mfg, cleanrooms
