

Ring Binders A4 ESD

SKU: 107-10 | Sizes: 25mm Spine, 50mm Spine

Features & Benefits

- ◆ Made from dissipative PVC material to ensure the binder is permanently anti-static and provides ESD protection for its entire lifespan
- ◆ D-shaped ring mechanism ensures secure document storage
- ◆ ESD Caution logo printed for easy identification of ESD compliance
- ◆ **Surface resistance:** Rs of 10^{11} Ohms, ensuring optimal ESD safety
- ◆ **T1000 time:** < 2 sec, offering fast dissipation of static charges
- ◆ Available in 25mm and 50mm sizes with 2 rings, suitable for various document storage needs
- ◆ These ESD Ring Binders feature a D-shaped ring mechanism, ensuring that documents are securely held, and they are printed with the ESD Caution logo to clearly identify their ESD-safe nature

About the Ring Binders A4 ESD

ESD Ring Binders A4 are specially designed to provide permanent electrostatic discharge (ESD) protection in static-sensitive environments.

Made from high-quality light blue dissipative PVC material, these binders ensure that your important documents, such as PCB designs and other sensitive paperwork, are stored safely without the risk of electrostatic discharge (ESD). The permanent anti-static properties of the material guarantee that the binder will continue to prevent electrical discharges for its entire lifespan, protecting both documents and components from damage caused by static buildup.

These ESD Ring Binders feature a D-shaped ring mechanism, ensuring that documents are securely held, and they are printed with the ESD Caution logo to clearly identify their ESD-safe nature. Available in 25mm and 50mm sizes, with a 2-ring configuration, they are ideal for storing documents in ESD-controlled areas.
