

SYNTHPOP ESD Safety Trainer

SKU: GS-SYNTHPOP

Features & Benefits

- ◆ **High-Quality Italian-Made Footwear** – Crafted with attention to detail for both comfort and performance.
- ◆ **Certified to EN ISO 20345:2011** – Meets ESD safety standards and provides reliable protection against electrostatic discharge.
- ◆ **Anatomic Footbed** – Scented polyurethane, holed for breathability and comfort, with low electrical resistance for added safety.
- ◆ **Size Range:** UK 3-15 (Euro 36-50), ensuring a wide range of fit for different foot sizes.

About the SYNTHPOP ESD Safety Trainer

Synthpop ESD Safety Trainer – High-Quality Italian-Made Footwear

The Synthpop ESD Safety Trainer combines the perfect blend of style, comfort, and ESD safety in a high-quality Italian-made design. Whether you're in the electronics, pharmaceutical, or any other electrostatic-sensitive environment, this trainer ensures reliable protection without compromising on comfort.

Certified to EN ISO 20345:2011, the Synthpop offers metal-free construction with a 200J composite toecap, providing protection against impacts while remaining lightweight. The microfibre upper with punched suede-like finish offers both breathability and abrasion resistance. Equipped with a polyurethane/TPU sole designed for low electrical resistance, the Synthpop offers exceptional traction and stability, ensuring safety in ESD-sensitive environments.

Specifications

Property	Detail
Toecap	200J Metal-Free Composite
Upper	Upper Material
Sole	Sole Construction
Lining	SANY-DRY®
Application	ESD-protected areas, electronics mfg, cleanrooms
