

Sensor S1901A for TS2200

SKU: GQ-S1901A

Features & Benefits

- ◆ **Real-Time Temperature Monitoring:** Provides accurate temperature feedback for enhanced soldering precision.
- ◆ **Compatible with TSS31A Soldering Pencil:** Works seamlessly to improve performance and temperature control.
- ◆ **Integrated with TS2200D Soldering Station:** Complements the TS2200D setup, creating a fully integrated soldering solution.
- ◆ **Supports H1901A Heating Element:** Ensures efficient heating and thermal recovery for optimal soldering results.
- ◆ **Lead-Free Soldering:** Ideal for professional use with lead-free solders.
- ◆ **Durable and Reliable:** Designed for long-lasting performance and consistent soldering quality.

About the Sensor S1901A for TS2200

The Quick S1901A Soldering Pencil Sensor is designed to work seamlessly with the TSS31A Soldering Pencil, providing real-time temperature feedback and enhancing the overall soldering experience.

Compatible with the TS2200D Soldering Station, this intelligent sensor ensures precise and reliable temperature control, allowing you to achieve consistent, high-quality soldering results. The sensor works with a 90-watt power supply to handle everyday soldering tasks efficiently, offering rapid thermal recovery and excellent performance for lead-free soldering applications.

Compatible with:

- TSS2200D Soldering Station
- TSS31A Soldering Pencil
- H1901A Heating Element
