

Solder Iron Connection Kit ESD

SKU: 503-539

Features & Benefits

- ◆ Designed for ESD-sensitive environments to ensure safe fume extraction
- ◆ Adjustable secure strap for positioning close to the soldering iron tip
- ◆ Compatible with T1, T15, T30a, T60, and T100 units
- ◆ Featuring an adjustable secure strap, it can be positioned near the soldering iron tip for precise fume capture

About the Solder Iron Connection Kit ESD

The BOFA Solder Iron Connection Kit ESD is specially designed for safe and efficient fume extraction during delicate soldering tasks in ESD-sensitive environments.

Featuring an adjustable secure strap, it can be positioned near the soldering iron tip for precise fume capture.

This kit includes stainless steel tubes, E clips, ESD silicone hose, and a brass cleaning brush, ensuring optimal performance and reliability in sensitive applications.

Tip connects to:

- T1, T15, T30a, T60 and T100 Units
