

Solder Pellets Tin/Lead 60/40 1Kg

SKU: 301-432

Features & Benefits

- ◆ **Alloy composition:** 60% Tin, 40% Lead
- ◆ **Typical melting point:** 183 - 191°C for effective soldering
- ◆ **Small pellets** for easy use and quicker melting in pots
- ◆ **High purity electronic-grade tin** for consistent quality
- ◆ **Made from virgin materials** for optimal performance
- ◆ Ideal for use with solder and tinning pots
- ◆ **MOQ 1Kg** for convenience and professional use

About the Solder Pellets Tin/Lead 60/40 1Kg

The Solder Pellets Tin/Lead 60/40 (1Kg) are high-quality leaded solder pellets designed for use with solder and tinning pots. Made from high-purity electronic-grade tin, these pellets are cut into small, convenient sizes to save time during the melting process. With a typical melting point of 183 - 191°C, they provide smooth and efficient soldering, ideal for various electronic applications. Made from virgin materials, these pellets ensure superior performance and reliability, making them a trusted choice for professionals.
